Based in Lyndhurst, Zenergi specialise in seeking the best energy suppliers for businesses and education providers. Whether this be through independent advice or brokering the best deal, the company aim to offer value for money at the same time as delivering outstanding customer service through 'The Zenergi Way'.

The Zenergi Way initiative seeks to gain knowledge of the individual customer. The aim is to identify personal interests to enable the company to tailor their service to the individual, to show an interest and to build a relationship with the customer, rather than just to talk 'shop'.

The business has also introduced several additional services to enhance the service, both at no cost; conscious of the current financial and environmental climate and the need to closely monitor budgets. Zenergi provide monthly energy reports providing 12 month ongoing expenditure and consumption data, whilst illustrating the customers' carbon emissions.

When requesting a new energy supply installation, the company provide full project management of the service. This co-ordinates

all parties involved removing frustrating delays for the customer.

All phone calls are always answered within three rings with a focus on getting back to clients when promised with the results they require.
