Contract Kitchens work on the ethos that without customers, the business would not exist and they are therefore at the centre of everything the business delivers.

Kitchen & Bedroom Showroom
Quality Craftsmanship and Value 

They are the only company in the New Forest to belong to the Hampshire County Council 'Buy with Confidence' scheme, which is Trading Standards approved. The referral website gives them top marks for quality customer service and value for money with all the customer feedback "recommending this business"

They are the only company in the New Forest to employ an installation manager and their own fitters, thus giving them total control over the installation of products for which they have won many awards.

They provide a welcome booklet to all visitors to the showroom. This explains the history of the company along with the products and services offered. It also contains details of their accreditation by Hampshire County Council, FIRA and of their Deposit

Bonding and Guarantee scheme.

The business believes in staff training. They arrange visits to 3 furniture factories and appliance suppliers yearly for product training. With the increased use of the Internet, it is of the utmost importance that they are able to demonstrate the extensive product knowledge during a presentation.
