New Forest VW Camper Hire offer guests short breaks and holidays in their range of fully restored vintage VW camper vans.

The business was established four years ago when the first van (Milly) was purchased, restored and launched into the New Forest. The response from members of the public quickly identified the gap in the market and since then the business has grown with 1-2 vans being added to the fleet each year. Herbie, a 1962 Beetle has also been added and is popular for weddings, picnics or just days out around the New Forest.

The business ensures that only right hand drive vehicles are provided for customers, converting them if required. The vans are fully equipped, providing cosy accommodation for up to four people at a time.

In a more recent innovation, they have just completed a project to fit an electric motor into one of their campervans (which is green of course). The plan is to equip the entire fleet with zero carbon motors in the near future making them truly sustainable.

They have also identified an opportunity to create income from selling official VW Camper merchandise.

Various efforts to integrate with the local business community have been made including recommending and tailoring routes which take in other small local businesses throughout the New Forest.
