Hire a Twizy are working to reduce the carbon footprint of visitors to the New Forest who would otherwise spend time travelling in petrol or diesel vehicles. The Renault Twizys are two seater fully electric vehicles with a range of around 50 miles and a top speed of 50mph, making them ideal for this purpose.

In conjunction with making the 26 Twizys available, the business is seeking to deploy a further 30 charge points across the New Forest including forest car parks, public transport stations and local pubs and restaurants. These will be available to any electric vehicle and will help to establish the area as a real electric vehicle friendly destination. Hire a Twizy are engaging with the broader transport sectors such as air, bus and rail to help with a joined up infrastructure. This is highlighted with the delivery and collection service for Twizys to local stations, hotels etc. for customers' use.

The business has recently taken delivery of its first Twizy Cargo. This is based on the two seater Twizy but with the rear seat being replaced by a large load as a delivery van. This opens up scope to work with local B2B companies such as bakeries, takeaway delivery companies, chemists who deliver prescriptions, care home providers, estate agents, motor spare part delivery companies etc. These companies are currently

driving around on local deliveries in petrol or diesel vans which are far below capacity.

Plans are underway to expand the offering from Twizys to electric bikes and the larger Renault Twizy to provide a range of zero emission options.
